

COMPANY PROFILE

Helping to drive our belief of possibilities to product

ABOUT US :

OUR STORY

"RaceEL Technologies based in Bangalore, INDIA was founded in 2023. We offer unique solutions including Embedded Hardware Design, Wireless Technology, Signal Integrity, Power Integrity, Antenna Design, Thermal Analysis, EMI/EMC Analysis, RF & Microwave. We work with customers to design, develop technology solutions that are optimum, innovative, and profitable".

OUR VISION

Our Vision is " Sustained Excellence in Product Engineering and Technology Integration for Customer Success "

OUR MISSION

Our Mission is to be the most reliable and innovative global company that delights customers through our world class products and services.

OUR SERVICES

Hardware design engineering

EMI/EMC Analysis

Thermal Analysis

ESD Analysis

Power Integrity Analysis

Signal Integrity Analysis

Wireless/Antenna Analysis

Mechanical Engineering

WHY CHOOSE US?

As a dynamic technology partner, we deliver differentiated solutions through seamless execution. We consistently exceed client and employee expectations leading to long-term relationships. The RaceEL team is loaded with highly skilled engineers and professional with vast industrial experience across various application domains and engineering horizontals.

CONTACT US

sales@raceelsystems.com

No.7,2nd floor, 80 Feet Rd, near Wipro Park,
1st Block Koramangala, Bangalore, Karnataka 560034.

OUR SERVICES

EMI/EMC ANALYSIS

Minimizing electromagnetic interference with simulation delivers high-performance, compliant and safe electronics systems, down to the microchip level

THERMAL ANALYSIS

Know how thermal energy will affect the efficiency, reliability and safety of your products.

POWER INTEGRITY ANALYSIS

Power Integrity or Power Distribution Network Analysis has become critical given the complexities in low voltage, high current, high performance, compute-intensive devices.

ESD ANALYSIS

Electrostatic discharge (ESD) level determination for accurate and reliable qualification of semiconductor devices.

MECHANICAL ENGINEERING

With the intention of providing complete mechanical engineering solutions, RaceEL Systems has expanded its Services. Since then, we have developed into a mechanical fabrication solution provider.

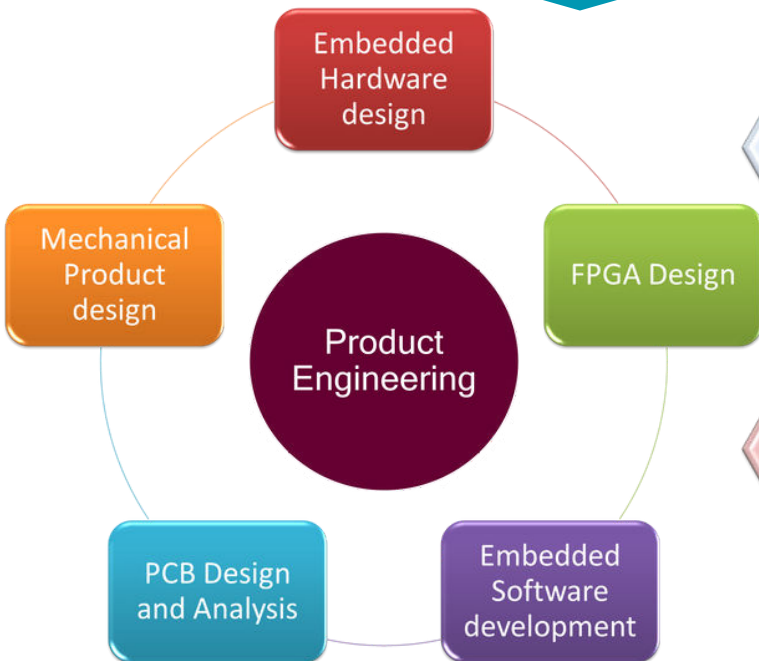

WIRELESS/ANTENNA ANALYSIS

The antenna often is one of the key reasons for the failure of an RF or wireless design. RF Antenna design is a complex process requiring high-end simulation tools and experienced RF antenna designers.

SIGNAL INTEGRITY ANALYSIS

Advancements in high-performance microprocessors and access to high-speed internet is driving the need for compact, high-performance systems that offers reliable data transmission with superior signal integrity.
